Hi All,

This is a follow up on my last post about the national website. If you did not distribute the first one to your membership please forward this one.

Due to the age of the software and it's complexity it has what the webmaster calls vulnerabilities but there have been no malicious software attacks. The fix is a new website which is in the works. National is working with a company in Paris but there is no timeline for completion. The Webmaster does recommend that the password you use is not one you use on other websites.
